

Aaron Leppin, MD, MSc

Implementation Scientist in the Late-Stage
Translational Research Program
Mayo Clinic
Assistant Professor
Mayo's Division of Health Care Policy and
Research

Dr. Leppin received his undergraduate and medical education at the University of Missouri. He completed his post-doctoral training in Mayo's Knowledge and Evaluation Research Unit with additional support from the NIH-sponsored Training Institute for Dissemination and Implementation Research in Health. Dr. Leppin's research focuses on building communities' capacity to deliver at scale evidence-based health promotion programs that improve the lives of older adults, advance population health and save costs. In partnership with many stakeholders, he led in the development of an innovative and scalable model for clinic-community collaboration in Southeast Minnesota. He is currently interested in advancing policies that encourage the sustainable advancement of such models in Minnesota and beyond.
